Principal UX/UI Designer with 15+ years of design experience and 8+ years specialising in UX/UI, with a strong background in games and transferable digital product experience.

I specialise in user research, usability testing, wireframing, prototyping, design systems, documentation, and UI motion. I've led UX/UI initiatives, mentored designers, and collaborated with cross-functional teams to turn complex problems into intuitive, engaging experiences.

Currently pursuing a second degree in Psychology to strengthen my understanding of human behaviour and user research.

EXPERIENCE

Principal UX/UI Designer at Auroch Digital
2022 to 2026 (Current)

- Led the UX/UI direction for Mars Horizon 2 under NDA, mentoring 4 Associate/Mid-level designers in usability testing, persona development, surveys, and data analysis, improving research quality and establishing greater consistency across the team's UX practices;
- Owned UX delivery for core feature flows, translating research, benchmarks, wireframes, and usability testing into validated interaction designs that increased perceived intuitiveness from 5/10 to 8/10;
- Designed UI screens, iconography, HUDs, design system, and sprite-sheet animations to improve interface consistency.

Senior UX/UI Designer at Gazeus Games
2021 to 2022

- Managed UX/UI decisions across Buraco Jogatina, Spades, and Euchre, with involvement in interface clarity and intuitiveness;
- Executed benchmarks, wireframes, user research, prototypes, usability testing, surveys, and data analysis for multiple game projects, for example improving FTUE and tutorial had increased Day 1 DAU in 30%;
- Designed user interfaces, iconography, HUDs, design systems, project guidelines, and interface animations using spritesheets, ensuring visual consistency and usability across the product;
- Implemented and optimised UI in Unity using UGUI, including interfaces, buttons, spritesheets, and animations, with additional experience creating and optimising animations in Spine;
- Prepared training on Unity UI basics and best practices for designers across other projects 4 at Gazeus;
- Preparing together with another Senior full documentation of all tools the UX/UI team used, to help decision-making about what tools are maintained and new tools to acquire. Reducing from 13 to 4 more efficient tools.
